PREPARING FOR A DIGITAL FUTURE

Your Mobility Partner

PIC Number: 948037649 Organisation ID: E10207576

Course Overview

A "Preparing for a Digital Future" training course covers a range of topics and skills related to digital technologies and their impact on various aspects of work and life to help learners develop the knowledge and skills necessary to succeed in a rapidly evolving digital landscape such as Digital literacy; Cybersecurity; Data analysis; Digital marketing/ project management; Cloud computing; Artificial intelligence; Remote work and Digital transformation.

Course Objectives

- Develop digital literacy among learners. This would include understanding the fundamentals of digital technologies, such as cloud computing, big data, artificial intelligence, and machine learning, and their impact on various industries.
- Help learners to build Digital Skills that are in demand in the schools and in the job market. These may include skills such as data analysis, digital marketing, project management, and social media management.
- Understand Digital Transformation by helping learners understand digital transformation, including the process of identifying business needs, developing a digital strategy, and managing change within an organization.
- Learn to Use Digital Tools providing hands-on experience with various digital tools and technologies, including software programs for data analysis, project management, and collaboration.
- Improve Career Prospects by helping learners improve their career prospects by developing new digital skills and knowledge that are in demand in the job market.

Learning Outcomes

By the end of the course, participants will be able to understand what others want, respond strategically to their wants and needs, and craft convincing and clear messages. By achieving improved verbal communication skills; enhanced active listening skills; increased confidence; strengthened interpersonal relationships; improved conflict resolution; better nonverbal communication and improved writing skills, participants improved their communication skills, which will benefit them in both their personal and professional lives.
